Speci-Fish lines	35

As a German manufacturer of braided and monofilament fishing lines we draw on over 60 years of experience in the development and production of fishing lines and fibres. Since the introduction of modern technology fishing lines, made of synthetic fibres since the late 1940s, we have invested our passion, creativity and knowledge into every new product. We were not only one of the first companies in Europe to make monofilament fishing lines, but in the early 1990s as the first supplier of braided fishing lines we laid the foundation for the overwhelming triumph of this new fishing line technology. Today, anglers expect a lot more from their fishing lines. The differences between products are often minimal, but for a specialist fishing technique they can be a great advantage. On the following pages we would like to show you our product range, shed some light on the fishing line 'jungle' and help you with CLIMAX lines to get a little closer to your dream fish.

Uwe Temple from Germany caught this exceptional halibut in a depth of 70m during his last trip to Norway.
The facts: length: 258cm weight: 210kg/ 462lbs, a true giant!
 Uwe used a TOUCH8+ braid with diameter 0,25mm as a mainline and a monofilament Haruna Seamaster leader with 0,80mm diameter.

Speedfädel

- Time- and nerve-saving, fluorescent threader
- Useful set of 3 for smallest guides down to Ø 1,6mm (sizes 1,5mm/3,4mm/5,9mm)
- MADE IN GERMANY

Have you ever struggled to thread up your line through all these tiny guides towards the top of your rod?

Cold fingers, poor visibility, finest diameter lines and to make matters worse all over thrilled by fishing fever...?

Hook in your brand new and luminous Speedfädel, adjust your reel break and rig up your rod in seconds!

Never again your line will drop and slip back all the way down your rod!

Never again you will damn poor visibility, cold shaking hands or finest, tiny line diameters!

Speedfädel® - simply efficient – made in Germany!

Speedfädel® BY

HIGHSPEED THREADER

Set of 3!

CARAT 12

MADE IN GERMANY

Know-how...

Braiding:
 Basically, we distinguish between two types of braiding, which are referred to as round or symmetrical and oval or asymmetrical. The picks of the braiding too – in other words the number of knottings per centimetre – also plays an important part.
 Climax fishing lines are braided extremely consistently and precisely, above all to achieve extreme reliability.

CARAT12 – Climax goes SPIRAL

The innovative spiral construction of this 12-fibre braid tags a milestone in history of braided fishing lines.

CARAT12 is worldwide the first and only fishing braid that does not open when being twisted.

- Genuine 12-fibre braid with roundest profile ever
- Line-twist is unable to open the braids structure
- Increased abrasion resistance and knot strength
- over all increased life span
- zero wind knots, perfect line lay and absolute silent.

Colours: fluo-yellow, dark-moss green

Ø	0,13	0,15	0,17	0,20
kg	9,5	12,8	14,9	18,1

PLATINUM

Climax PLATINUM – 8 Braid

The ultimate 8 braid! 8-fibres, braided on state-of-the-Art computer-controlled machines, using finest HMPE fibres and perfectly stretched using laser-technology! The result: a perfectly round,

tight-braided and ultra smooth and supple mainline braid in thinnest diameters and best breaking strength. Teflon®-coating makes for high abrasion

resistance and perfect casting properties. Pure delight guaranteed when using this first-class braid for perch, zander, bass or pike!

Colours: fluo-red, khaki, grey-violet

kg	7,0	8,5	10,3	11,9	15,5	16,9

TOUCH 8+

Excellence for your success
made in Germany!

The brand new TOUCH 8 plus: By the first touch this incredibly soft 8-fibre braid will fascinate you and not let you go – the best braid you ever fished!

- Genuine 8-fibre braid in ultimate perfection – extremely soft and round
- Extremely supple surface enables incredible fishing

- Noiseless and frictionless – the new High-Tech finish makes your TOUCH fly through the guides
- Increased movement and agility of lures
- Lowest possible stretch

Colours: dark green, pink, chartreuse

Ø	0,10	0,12	0,14	0,16	0,18	0,20
kg	6,8	9,2	11,3	14,2	16,6	19,0
Ø	0,22	0,25	0,28	0,30		
kg	21,5	24,0	26,8	29,5		

Good to know:

Diameter:

Even with the most exact braiding and special stretching, a braided line body, when measured with a micrometer, will show deformity, and a laser measurement is imprecise due to the often 'out-of-round' body. For these reasons, approximate values are most often quoted for the diameter. You should therefore buy your braided lines according to the tensile strength or breaking strain and then take a look at the diameter.

miG 8

Extreme BRAID - Made in Germany!
The new 8-ply braid for professionals shows the smoothest surface ever!

Genuine 8-ply HMPE-fibres perform extremely high breaking- and knot strength. Due to our proprietary thermofixation process, this slightly stiffer and extremely supple braid has enormous

durability and outperforms when long distance casting is required. Due to the close-to-zero elongation, excellent control over bait and fish is guaranteed.

The polysiloxane sealing stands for extreme abrasion resistance, protection from dirt-infiltration as well as salt and UV-rays.

Colours: fluo-yellow, fluo-orange, olive-moss green

kg	6,5	7,9	9,5	13,5	15,9	18,2
Ø	0,20	0,22	0,25	0,28	0,30	
kg	19,5	21,9	24,5	27,8	29,6	

LASER LINE

Superior fibre technology
This unique, new braid made from 100% Dyneema® SK-75 fibres outperforms other braided lines!

The breaking strength of this German-made braid has increased by 25% - keeping the same diameters of course! Its super low elasticity (max. 2,5%) results in direct contact and control over lure and fish at any time.

Due to thermofixation and a special Teflon®-finish, the LaserLine performs incredibly when casting and lasts considerably longer.

Thanks to the Climax Premium-polysiloxan sealing, this braid features extreme abrasion resistance, colour fastness and protection from dirt-infiltration, salt and UV-rays.

Colours: yellow-orange, white, black, dark-olive

kg	16,2	18,3	20,0	26,0	29,0	35,0
Ø	0,35	0,40				
kg	40,0	44,0				

Did you know...

Stretch:
Most braided lines exhibit a very slight stretch of between 1% and 5% and provide excellent direct contact to bait and/or fish. When fishing with modern methods in particular, such as the Drop Shot technique, a good braid is absolutely essential. The very low stretch does, however, also mean a perceptibly higher stressing on the tackle. This makes it particularly important to have the right setting on the line brake when using braided lines.

miG

Peak performance made in Germany meant for fishing maniacs! 100% extra strong HMPE-fibres.

High Quality:

Abrasion resistance and sealing: A braided line made of Dyneema® which is not sealed may be strong, but when it's subjected to wear it pretty soon splits into individual fibres. All our braided lines are sealed and that makes them a great deal less susceptible to abrasion. During production we distinguish between two main

refinement processes: thermo-stretching and sealing. We have also developed a technique which increases the abrasion resistance of the best sealed line by five times. Lines treated in this way have set the standard for years, right across the market, for catfish or carp leaders.

FLASH BRAID

100% HMPE fibre
All Flash Braids are made in Germany using the newly-developed, high molecular PE fiber and conform to highest quality standards.

Colours: grey-green, fluo-yellow

Ø	0,04	0,06	0,08	0,10	0,12	0,14
kg	2,7	3,8	5,6	6,5	9,0	10,0
Ø	0,16	0,18	0,20	0,22	0,25	0,28
kg	11,5	13,0	14,8	16,5	19,0	22,0
Ø	0,30	0,35	0,40			
kg	28,0	35,0	39,0			

- Pure Dyneema® fibres & micro braiding for extremely high breaking strain and knot strength
- Thermofixation for improved castability, durability and a super supple surface

- Polysiloxane sealing for max. abrasion resistance and protection from dirt-infiltration, salt and UV-rays

Colours: yellow, grey, green

Ø	0,08	0,10	0,12	0,14	0,16	0,18
kg	5,6	6,5	7,5	9,0	11,0	13,0
Ø	0,20	0,22	0,25	0,28	0,30	0,35
kg	14,5	16,5	18,5	21,0	24,0	30,0
Ø	0,40	0,50	0,60	0,70	0,80	
kg	35,0	43,0	48,0	65,0	75,0	

- Slides almost frictionless through guides → excellent casting
- Round braid, up to 8 strands
- High breaking strength, especially on the knot

- Highest abrasion resistance due to PTFE-surface treatment
- Fiber impregnation protects against salt and dirt infiltration → excellent use for sea-fishing in diameters up to 0,80mm!

Our advice :

Knots and knot strength:
Braided Dyneema® lines have a perceptibly higher tensile strength or breaking strain than monofilaments. The knot strength of a braided line, by contrast, is in part less than 70% of the linear strength. Lines subjected to severe stretching in particular often have a noticeably lower knot strength than unstretched braids. This is why Climax braided lines are specially treated, and, depending on the knots, have a knot strength of 70% to 90%.

FLASH BRAID SINKING

100% HMPE fibre
All Flash Braids are made in Germany using the newly-developed, high molecular PE fiber and conform to highest quality standards.

- Slides almost frictionless through guides → excellent casting
- Round braid, up to 8 strands
- High breaking strength, especially on the knot
- Highest abrasion resistance due to PTFE-surface treatment
- Fiber impregnation protects against salt and dirt infiltration → excellent use for sea-fishing

Ø	0,14	0,16	0,18	0,20	0,22	0,25
kg	5,6	6,5	7,5	9,0	11,0	13,0
Ø	0,28	0,30	0,35			
kg	14,5	16,5	18,5			

Touch Down – Fast sinking Braid

The clever braid „made in Germany“ – fast sinking and a smart rating scale. Dyneema® and extra heavy Downtex fibres are blended using a special process to create this brand new braided line. TOUCH DOWN braid is extremely abrasion resistant, features very high knot strength and, thanks to its chromatic scale, provides precise information on casting distance or water depth.

Benefits include:

- TOUCH DOWN's sink-rate of 5m/min!!! 3 times faster than other sinking braids and 2 times faster than Fluorocarbon

- 5-colour chromatic scale: easy and precise rating of casting distance and water depth.
- Besides their heavy weight, the new Downtex fibres also feature abrasion resistance, suppleness and good knots for increased casting distance, less wear and less failure. Climax TOUCH DOWN, a touchdown for ambitious carp and feeder anglers!

Ø	0,08	0,10	0,14	0,16	0,18	0,22
kg	3,0	3,8	4,7	5,6	6,7	8,5
Ø	0,25	0,30				
kg	10,0	14,5				

FLUOROCARBON Lines

All CLIMAX Fluorocarbon lines are made 100% of pure fluorocarbon. Unlike conventional monofilaments made of polyamide, fluorocarbon is very heavy, which means that these lines sink rapidly. As well as this, fluorocarbon does not absorb water. Even after prolonged use in water, neither the tensile strength nor the stretch of the material change. Fluorocarbon is extremely wear resistant and its light refraction factor is very close to that of water, which means that even fish that can see well would find the line very hard to see. These are the reasons why fluorocarbon is so popular and so successful for use with predatory fish tackle, but an absolute must with carp and sea fish as well.

MAX MONO FLUOROCARBON
Supreme quality Fluorocarbon! This excellent, pure high grade Fluorocarbon leader material is extremely soft and shows very little elongation. Abrasion resistance is much higher than normal monofilaments and thanks to its incredible softness and purity of material, knot strength is excellent!

Ø	0,12	0,14	0,16	0,18	0,20	0,22
kg	1,5	1,9	2,4	2,9	3,5	4,2
Ø	0,25	0,28	0,30	0,32	0,35	0,38
kg	4,9	6,0	7,0	7,7	9,0	10,0
Ø	0,40	0,45	0,50	0,60	0,70	
kg	10,9	12,8	15,0	20,0	25,0	

CLIMAX SELECT FLUOROCARBON
SELECT FLUOROCARBON has mastered a weakness that plagues most other fluorocarbon lines on the market: it has particularly high knot strength of about 80% and a suppleness that results in perfect casts and bait presentation. This is a very special line. Whether you are fishing in crystal clear water or stalking the most timid of fish, SELECT is the right choice. It has a similar rate of refraction to water so is practically invisible to fish, which dramatically increases your chances of success.

Color: transparent

Ø	0,13	0,15	0,17	0,18	0,20	0,22
kg	1,5	1,9	2,4	2,8	3,4	3,9
Ø	0,25	0,27	0,28	0,30	0,33	0,36
kg	4,7	5,0	5,9	6,8	7,5	9,4

CLIMAX FLUOROCARBON
We give the angler the possibility to catch tricky fish in over-fished or cristal clear water with this special line. It quickly breaks through the surface tension, because it is heavier than water and floats inconspicuously under the surface. Since this line is water proof, the breaking strain remains at 100% even when wet for hours.
Attributes:

- Waterproof and UV-resistant
- Sinking (3 times heavier than nylon)
- Invisible under water
- High abrasion resistance

Color: transparent

Hyper Mono

Our new top quality monofilament high performance lines, made from an entirely newly developed copolymer: a special characteristic of these very soft lines is the particularly abrasion-resistant and smooth surface. These properties allow for greater casting distances and optimum protection of the line. The HYPER lines also feature excellent knot strength and very low memory. Thanks to the exact calibration, a uniform diameter is guaranteed over the entire length of the line.

- extremely smooth line surface
- sinking
- low stretch

CLIMAX HYPER MATCH

The Hyper Match was created especially for the demands of match fishing. Thanks to an extra treatment of the line surface, it is extremely smooth, which lets the line run through the guides much more easily. That in turn means noticeably better casting distances than with conventional monofilament lines. It has also good sinking characteristics, which reliably prevent the formation of line loops on the surface of the water. The Hyper Match has low stretch to allow for direct contact with the fish, and excellent wet knot strength.

Colours: copper, light grey

Ø	0,08	0,10	0,12	0,14	0,16	0,18
kg	0,6	1,0	1,5	1,9	2,5	3,4
Ø	0,20	0,22	0,24	0,26		
kg	4,0	4,7	5,2	6,0		

- perfect casting properties thanks to the particularly smooth line surface
- extremely abrasion-resistant surface
- low stretch

CLIMAX HYPER FEEDER

The HYPER Feeder is enormously supple and amazingly abrasion-resistant. Thanks to its low stretch, even the slightest of takes can be identified very precisely. The line uses a silicone coating to slide more easily through the guides and achieve noticeably longer casting distances. Other important features are the very good sinking properties, high knot strength and low memory. It's perfect for feeder fishing. The brown colour of the line also makes for optimum camouflage.

Colour: dark brown

Ø	0,14	0,16	0,18	0,20	0,22	0,25
kg	1,7	2,3	3,0	3,5	4,1	5,0
Ø	0,28	0,30				
kg	6,2	7,4				

- extremely smooth monofilament
- excellent casting properties
- reduced elongation for more control

CLIMAX HYPER SPIN

The perfect high-performance line made of the best copolymer material for fishing with hard- and softlures as well as dead bait, super supple and superbly abrasion-resistant. The low stretch allows for direct contact, which is really important especially when spinning with hard- or softlures. Thanks to the amazingly smooth fluorocarbon-sealed surface, exceptionally long casts can be achieved. The high wet knot strength and an extremely low memory are further guarantees of a fishing experience which promises to be really successful. The striking colours make it easier for the human eye to see the line, even under poor lighting conditions, without scaring the fish.

Colours: red, fluo-yellow, white

Ø	0,18	0,20	0,22	0,25	0,28	0,30
kg	2,8	3,6	4,5	5,2	7,0	8,2
Ø	0,35					
kg	10,5					

- Fluorocarbon-coating
- best possible casting properties
- excellent abrasion resistance

CLIMAX HYPER CAST

This very supple monofilament is a true specialists line and was designed for extra long and precise casting. Thanks to its special fluorocarbon coating the HYPER Cast has truly amazing sliding properties to make the line literally fly off the reel and perform extremely long casting. It goes without saying that the HYPER Cast has extremely low stretch and very high knot strength, while its exact calibration ensures a uniform diameter over the entire length of the line.

Colours: fluo-white, red-brown

Ø	0,08	0,10	0,12	0,14	0,16	0,18
kg	0,6	1,0	1,4	2,0	2,4	3,0
Ø	0,20	0,22	0,24	0,26	0,28	0,31
kg	3,6	4,5	5,1	6,0	6,8	7,9
Ø	0,33	0,37	0,40			
kg	8,8	11,1	13,0			

Important:

Abrasion resistance:
The significance of abrasion resistance stands out when we fish tricky waters with lots of obstacles or when the line is used with sharp toothed fish. Special processing methods and coatings allow for abrasion resistance to be increased by up to 12 times. Special features: Climax Hard-Mono and Fluorocarbon.
In both cases, a special and denser raw material has been used right from the start. This achieves abrasion resistance which is many times higher than with conventional monofilaments made of polyamide.

Attention:

Knots & Knot strength:
Depending on raw materials, finish and depending on the knots, a monofilament line has a knot strength of 75% to 98% (compared to its linear strength). The slightly harder fluorocarbon attains a knot strength of 60% to 80%. In general it can be said that the higher the stretch and suppleness of the line, the greater the knot strength.

CAUTION: It's not unusual for hard fluorocarbon to squash or even cut a soft monofilament. This is why you should always use a swivel when connecting two different materials to each other.

Colour:
A monofilament fishing line generally is coloured all the way through. This means that colour pigments are already mixed in with the plastic granulate and these lines are almost immune to fading. The colours of our monofilament lines are individually matched and optimised to the individual types of use and possibly even to the species of fish you are out to catch.

CLIMAX SELECT HIGH TEC
This exceptional line is the best choice for the highest handling demands and maximum security in fresh and salt water and for all kinds of fish.
The high-quality nylon is molecular sealed and stretched multiple times, so that breaking strain, knot strength, memory elasticity and abrasion resistance are united in the best possible combination and will not be outdone by any other monofilament.
Color: turquoise blue

kg	14,0	16,0	23,0	29,0	

CLIMAX Edel-Trout
A new specialist's line from Climax, custom-built for trout fishing. To achieve optimum protection and a very smooth surface for the line, the surface has been sealed with fluorocarbon. This prevents the line from absorbing water, which would reduce its knot strength and abrasion resistance. Excellent casting abilities and very low memory are extra benefits.
The matt orange colour is clearly visible to the angler for best possible control, but can only be seen with difficulty by fish. The line does of course also come in a less noticeable light grey colour.

MAX Quality
For 100%, the new Climax MAX mono is made of a supreme multi-polymer, which is made exclusively for Climax.

MAX Control
This special monofilament has a very low stretch of below 20%. Normal lines have approx. 28%. The MAX mono allows a maximum of control over bait and fish.

MAX Strength
Linear strength as well as knot strength of MAX mono are superb and, as all Climax lines, continuously tested and confirmed in the lab.

MAX Reliability
The MAX mono is extremely constant and reliable with lowest tolerances. Every inch is equally strong, thin and round.

MAX Resistance
A special surface treatment makes the line cast easily and silently through the line guides. On top, the line is very abrasion resistant.

MAX ICE
Climax' innovative additive perfectly protects this mono from icing. Failure caused by extremely cold water temperatures in toughest conditions have effectively been reduced – there is no better mono in cold water.

Interesting Info:

Stretch:
Basic principles:
A monofilament line has an average stretch of between 18% and 30%.

Advantages of high elasticity:

- Shock absorption when fighting fish
- Imposes less wear on the fishing tackle
- Better knot protection
- Prevents the hook from slipping and reduces loss of fish

Advantages of low elasticity:

- Excellent control on bait and fish
- Direct, rapid strikes can be achieved

Memory:
'Memory' is the term used to describe how monofilament lines 'remember' the time spent on the reel. If the line curls a lot when it unwinds, it has a lot of 'memory'. Dryness and high temperatures reinforce this effect. Soft lines with high stretch generally have less memory.
By way of a special treatment, directly after the extrusion, we reduce this memory effect as far as possible. But memory cannot be eliminated completely; other properties of the line would suffer too much as a result.

HARUNA SEAMASTER

We offer sea anglers an innovative all-in-one package with this all encompassing saltwater program that suits our competent dealers and customers in the area of deep sea fishing. Breaking strain, elasticity, abrasion resistance and precision are harmonized through the most modern technology in monofilament and multifilament line manufacturing.

HARUNA PLANER BOARD LINE
 Finally a high-end professional Planer Board Line made from 100% Dyneema®. This very strong and highly abrasion resistant line has an extremely smooth surface – perfect for using Planer boards all over the world.
 Color: orange

Ø	1,30	1,60
kg	130	175

HARUNA SEAMASTER MULTICOLOR BRAID
 Our new braided sea fishing line is made of high-molecular PE fibres in a multicoloured finish. The HARUNA Multicolor has outstandingly good abrasion resistance and knot strength. Thanks to its particularly smooth surface, the line glides through the rings with no resistance from friction. A special fibre impregnation process also reliably prevents dirt and salt from penetrating the line and helps ensure a long service life. The colours of the line change every 10 metres.

HARUNA SEAMASTER BRAID „DISTANCE“
 Our popular and well proven high-performance braid for toughest saltwater conditions now features a precise scale for depth control. Each 10 meters five recurring and broad visible colour marks help to precisely measure the depth you currently fish. A smooth surface, its tight pix count, extreme

abrasion resistance and excellent knot strength make this line your most reliable companion fishing in challenging offshore conditions. Color: yellow

kg	15,0	17,0	25,0	30,0	33,0

HARUNA SEAMASTER

HARUNA SEAMASTER LEADER
This exclusive leader material is capable of an enormous breaking strain – 95 kg with just 1.20 mm diameter – and nevertheless does not have problems with knots. Whether a self-knotted paternoster or a deep sea leader, you can completely rely on this monofilament.
Color: transparent

Ø	0,60	0,70	0,80	0,90	1,00
kg	24,0	32,0	42,0	51,0	68,0
Ø	1,20	1,40			
kg	95,0	120			

HARUNA SEAMASTER HARD LEADER
This leader material has been developed, through its special hardening, for the roughest fishing in deep sea, ledges, coral and mussel reefs. It sticks stiffly out from the main line and holds the hook in the correct position. With such a high breaking strain (180 kg at just 1.60 mm diameter), even a Halibut of 150 kg would not be a problem. Haruna Seamaster Hard Leader is even successfully used in professional fishing and valued for its transparency.
Attributes: • Ideal also for professional sea fishing
Color: light-grey

Ø	0,60	0,75	0,90	1,05	1,20
kg	30,0	42,0	60,0	80,0	100
Ø	1,45	1,60			
kg	150	180			

HARUNA SEAMASTER FLUOROCARBON
This leader material is almost invisible for fish, thanks to a light refraction index that is almost that of water. The leader sinks 3x faster than leaders made of nylon, it is UV-resistant, resistant to cold and waterproof, so that the original breaking strain remains the same even after hours of fishing. The perfect leader for frightened fish or overfished waters.
Color: transparent

CLIMAX SURF-LINE
Aerodynamic tapered line with color coding for extreme distances. You will achieve greater distances with the aerodynamic taper of this surf line than you would with a parallel line. It is effectively protected from sand, rocks and mussels by a special surface coating. In order to better estimate casting distance, the lines entire length is four-colored contrasted. We also offer the tapered shock leaders separately at a total length of 15 meters and at five pieces per spool.

Knotless tapered line 220 m, Color: 4 changing colors and transparent taper

CLIMAX WIND-ON LEADER
The perfect leader - ready to fish! CLIMAX WIND ON LEADERS meet the toughest requirements of the world's best off shore competition anglers. They are easy to use, withstand the strongest fights and slip back easily through the tip guide when playing fish close to the boat for safer landing or releasing fish. Armed with CLIMAX FLUOROCARBON the Wind-On Leader is perfect for frequently fished waters whereas CLIMAX HARD LEADER virtually boosts the leaders breaking strain and is the right choice for real big fish... both are incredible abrasion resistant and durable. Make your choice!

REDFISH RIG

Custom-built rig featuring seven circle hooks, well spaced out to target large deep-swimming shoals of redfish. Several swivels are incorporated to avoid tangles. The clear tubing and floating beads make for anti-tangle properties and protect the rig from the toughest teeth. Fish or shrimp can be added to make the presentation even more tempting. Anglers are advised to wait for a time after a take to maximize the catch.

Ø 0,90mm 51 kg 460 cm

HALIBUT DEAD BAIT RIG

This dead bait rig for large halibut features a thin wire fitted to the large single hook which allows for optimum attachment of the fish fillet. A transparent tube prevents twisting and protects the line. The large spinner in front of the bait is particularly attractive to halibut, the rotation inducing many more takes.

Ø 1,00 mm 68 kg 165 cm

FLATFISH RIG

This natural bait rig is ideal for boat fishing for plaice, flounder and other species. The spinner in front of the bait is particularly attractive to flatfish, while the rotation is a real 'crowd puller' that will produce a lot more fish. It works best with herring or mackerel off-cuts, but shrimps or prawns are also a good choice of bait.

Ø 0,50 mm 20 kg 120 cm

HALIBUT SPOON RIG

Big halibut are the target for this twin function spoon rig. It can either be fished as 'flutter-rig' or using fish fillet in various sizes thanks to its moveable hook. Spinners and spoon are highly attractive and capable to induce more takes than any other rig.

Ø 1,00 mm 68 kg 80 + 50 cm

LING RIG

A revolutionary rig designed to catch big ling. Unlike normal rigs, which include two single hooks, this features a large treble that can be used with bait fish or large shads.

Ø 1,00 mm 68 kg 175 cm

HARUNA SEAMASTER RIGS

Developed by specialists for real northern sea professionals. Every rig is the creation of many years' careful thought and design by the author of Kutter & Küste and Sportex Team angler Sebastian Rose. Each individual item has been extensively tested and optimised during Sebastian's many fishing trips and guided fishing tours in Norway. The result is a sophisticated range of rigs refined in every detail. Huge numbers of excellent catches during the rigs' testing phase bear witness to their excellent catching qualities. These rigs make exclusive use of the tried and trusted Climax Haruna Seamaster lines, made of high strength monofilament material for all kinds of saltwater fishing. They are matched with top quality VMC hooks.

SEA JIG

HAKE RIG

This rig spells success for hake and shellfish. These species are happiest when close to the sea bed so the rig has been designed extra long. The illuminous tubes protect the rig from sharp teeth, as well as attracting large numbers of fish. The rotating spinners and the octopus in front of the bait really pull in the target fish and ensure a high bite rate.

Ø 0,90 mm 51 kg 390 cm

„CULT“ Carp Lines

A system to success – You find every-thing necessary for successful carp fishing.

The perfect carp line, innovative leader materials for all different sorts of applications, proven “ready-made-rigs” as well as tools.

CULT DURAMAX MONOSHELL
The innovative eight-carrier carp braid from Climax. Thanks to the cruciform braided and highly wearresistant fluorocarbon threads, a Mono-Shell structure is created which provides consistent protection against abrasion. The line’s suppleness and circular cross section allow it to slide through the ring without resistance, resulting in longer casts.

Ø	0,18	0,20	0,25
lbs	15,0	25,0	35,0

CULT FLUOROCARBON
Just for mainline or rig making the brand new CULT Fluorocarbon is without doubt the ideal line to use. Unlike conventional Fluorocarbons on the market, it is very supple and has low memory. Cult Fluorocarbon consequently casts further and performs better knot strength than others.

Thanks to an extremely high density this line quickly sinks the ground and with its discreet shade of olive it perfectly blends into the lake bed.

Colours: transparent, olive-transparent

Ø	0,25	0,28	0,35	0,40	0,45
kg	4,8	5,5	8,0	10,6	12,5
lbs	10,0	12,0	17,0	22,0	25,0

CAMOU MASK
Our developed, sinking, four-carrier braided carp line with a top price-to-performance ratio! Thanks to the tight braid, the line has a round, supple surface, while a special fibre-sealing technique prevents the absorption of water and gives the line excellent resistance to abrasion. The subtle camouflage colour perfectly masks the line on the bottom.

Ø	0,18	0,20	0,24	0,30
lbs	10,0	15,0	20,0	30,0

CULT CARP-LINE –
Best available raw materials for stability and increased life span! Specially formulated surface for extra abrasion resistance and castability. Unidirectional molecule structure for maximum breaking strain and controlled elasticity. Polymer additives for perfect suppleness and lowest possible memory. Linked molecules increased for up to 90% stronger knots. Computer controlled line diameter, density for consistent breaking strain and maximum reliability. Color: black

Ø	0,25	0,28	0,30	0,34	0,38
kg	5,0	6,1	7,0	9,0	11,0

CULT EXTREME
The perfect mainline for extreme situations that demand everything from your tackle. This handy and super supple line has got nothing in common with what you know about carp lines until today. A process in production adds incredible abrasion resistance exceeding other monofilaments by up to 12 times. Memory does almost not exist with the CULT Extreme line and a 20-25% elasticity allow to control a hooked fish in every situation. Its mattfinished olive colour virtually vanishes in an underwater ambience.

Ø	0,28	0,30	0,35	0,40
kg	5,9	7,2	9,2	11,5

CULT DEEP PURPLE
This special new monofilament is designed to meet all the demands of carp fishing. The nylon core, sheathed with fluorocarbon, causes the line to sink as well as preventing water absorption. The sheathing also protects against wear and provides controlled stretch. Thanks to the incredibly smooth surface, the line slides rapidly through the rings free of friction. The distinctive purple adds a visual highlight.

Ø	0,28	0,30	0,35	0,40
kg	5,8	7,1	9,1	11,2

CULT FLUOROCARBON SNAG LEADER
In response to demand, Climax has produced the 100% fluorocarbon Snag Leader. Enormously hardwearing, even when fished over shells or sharp stones, it also has low stretch and memory properties. A leader for really tough conditions.

Ø	0,50	0,60
kg	15,5	20,3

CULT CARLINE SHOCKLEADER
The ultimate shock leader when it comes to casting long distance. Its well balanced stretch perfectly absorbs the casting energy so the mainline will not break even when casting at maximum load. The refined surface makes for excellent abrasion resistance – perfect when fishing tricky waters with mussel banks or other tough obstacles.

Ø	0,50	0,60

SNAKEBRAID
Climax Snakebraid helps to preserve nature, clearly improves existing products and makes fishing more efficient and sustainable. The non-toxic leader outperforms traditional leadcore in suppleness, abrasion resistance and camouflage. Thanks to its high density fibres, Climax Snakebraid is

extremely heavy and can fully abstain from using lead to make it sink. The absence of the toxic metal boosts the suppleness and with its highly effective camouflage patterns it hides perfectly in the ground. Climax Snakebraid splices easily and can be perfectly knotted as well. It is available in WEED, SILT and Gravel patterns.

Camouflage	lbs 20 30
Weed	kg 9,1 14,5
Silt	m 20 20

SKIN BRAID
Use CULT Skin Braid to make the most inconspicuous anti-tangle rigs. Coated with a removable anti-tangle skin this line is a must have in every tackle box. Simply remove the coating to expose the extra supple braid that perfectly blends in with all possible lake beds.

Silt	lbs 20 30
Weed	kg 9,1 14,5
	m 20 20

HUNTERS BRAID HEAVY
The special surface coating of this soft, very close-knit braid combines with its hard-wearing qualities to easily cut through seagrass and other vegetation. A newly-developed, heavy fibre has been incorporated into the braid to achieve a rapid sink rate and ensures the cast always lies flat on the bottom.

Silt	Ø 0,25 0,30 0,45

DURAMAX LEADER
Extremely smooth and 5x more abrasion resistant shock leader made of braided DYNEMA®-Fibre to relieve the main line during far casts. A perfect combination with Climax CULT EXTREME! Length: 25 m

Silt	kg 7 10 15
Weed	lbs 15 20 35
	m 20 20 20

XPANDA LINK
Made from fluorocarbon, this special braid expands under pressure to create a kind of "rubber band" effect, making it difficult for a fish to throw the hook when being played. The braid is very soft and the weight of the fibres ensures perfect presentation on the bottom.

Transparent	Ø 0,40 0,50 0,60
	lbs 15 25 35
	m 20 20 20

FLEXI CHOD
This anti-tangle hooklink is just right for presenting baits against murky background. The rigid material can easily be shaped and perfectly recovers when set under tension. Additional advantages include high abrasion resistance and low stretch.

Transparent	Ø 0,35 0,40 0,45 0,50
	lbs 15 20 25 30
	m 20 20 20 20

CHIMERA MONO
This almost invisible fluorocarbon rig features an extraordinary suppleness to ensure the fish suspects nothing when it takes the bait. The extra heavy hooklink mono is an excellent sinker, features low stretch and is extremely abrasion resistant.

„SNATCH“ Predator Lines

The Climax SNATCH product range for predatory fish has been completely redeveloped in close co-operation with our predator experts. We have used only the highest quality materials for the range, which covers a broad spectrum, starting from complete, ready-to-use natural baits through to Fireball rigs and complete assembled rigs. All leader materials are also available on spools, including crimp sleeves that allow anglers to put together their own rigs. The range has all the tried and trusted quality the market has come to expect from Germany's top rig specialist.

FLEXISTEEL 7x7

- 49 (7x7) ultra-fine, tight braided steel threads
- Non-reflective surface
- Extraordinarily abrasion-resistant and highly supple
- Excellent breaking strain
- Perfectly suited for freshwater as well as saltwater

LEAD CORE LEADER – ALL PURPOSE
This abrasion-resistant lead core leader is heavy and virtually disappears on the lake or river bed. Equipped with a loop on one end and a swivel on the other end, it is suitable for both, inline and bolt rigs. The perfect choice for muddy water beds and wary fish. Combine with Climax CULT Hunters Braid as hooklink!

LEAD CORE LEADER – SAFETY BOLT CLIP
This ready-made bolt rig features an abrasion resistant sheath for difficult waters. Extra heavy and supple, it sinks quickly and virtually disappears on the lake or river bed. All materials used are of highest quality and perform to the maximum even after long-term use.

CLEAR LEADER
Featuring an extra-smooth, soft coat, this top-quality clear leader sinks and virtually vanishes on the lake or river bed. It is suitable for both in-line and bolt rigs. This leader is a „must-have“ in your tackle box and the perfect choice for clear water and shy fish.
Content: 1 piece/pack
• Color: transparent

SHRINK TUBE
Careful steaming of the tube will shrink it by 50%. This makes it ideal for various rigs such as line-aligner rigs and many other. Should not be exposed to flame as this could harm the material.
Color: transparent, black

SPICING NEEDLE – QUICK CHANGE
The perfect tool for making knotless connections or rigs using Leadcore, Climax Dyna Splice or other material. Ask your dealer for a Climax refill pack if you run out of needles.
Content: 1 piece/pack + 4 spare needles

SPICING NEEDLE REFILL PACK
Refill pack for CULT Splicing Needle - Quick Change (6 Pieces). Content: 6 pieces/pack

FLUOROCARBON LEADER

- 100% fluorocarbon

Do it yourself...

Our SNATCH LEADERS come in spools for making individual rigs. All the spools come with a small box of suitable crimp sleeves.

SEA-JIG

This rig is ideal for presenting a dead bait close to the bottom when drift fishing from a boat. The Climax Cult Catfish braid has very high abrasion resistance and is armed with VMC treble hooks for extra security when tackling powerful predators. With a 0.92mm diameter and 80kg breaking strain, it is suitable for both sea and freshwater fishing.

Contents: 1 unit. Length 25 cm.

g	150	190	230
hook	3/0	4/0	4/0

SNATCH Hook Leaders are made from tried and trusted Climax materials and are combined with tough, ultra sharp treble hooks made by VMC. All crimp sleeves are fixed with five pressure points for extra reliability.

Only the finest quality Climax materials are used for the SNATCH Leaders.

A strong swivel and cross-lock snap provide added security.

FIREBALL CATFISH RIG

Designed specifically with catfish in mind, the Fireball is perfect for vertical fishing of a dead bait or soft bait close to the bottom where catfish lurk. The Climax Cult Catfish braid has proven abrasion resistance and the two VMC treble hooks provide extra assurance against losing big fish.

Contents 1 unit. Length 25 cm.

Heads with 30g+ 60g are equipped with 7x7 steel wire and treble hook (braking strain: 5kg / 10kg)

CULT Catfish Lines

The CLIMAX catfish program has earned itself an excellent reputation right throughout Europe's catfish centres.

Whether in Italy, Spain, France or Germany many leading anglers trust CLIMAX CULT catfish line, their success proves them right.

CLIMAX CATFISH X-CAST
This catfish spinning line has been specially developed and tested under extreme conditions. The special sealing process, which has been tested by neutral laboratories, makes this line not just smooth as a monofilament line, but it is also more resistant to abrasion than any comparable braided line. This is the ideal fishing line for waters plagued by mussel beds and sharp stones, a line that pros can trust! Color: red-brown

Ø	0,28	0,39
kg	25	40

CLIMAX CATFISH LEADER
We have utilised the same production process as used in CATFISH X-CAST to develop this leader material out of abrasion resistant DYNEEMA®-Fibres. It remains very supple – for perfect bait presentation – and is very easy to work with. The durability of this leader is extremely high. Color: grey, yellow

Ø	1,00	1,30
kg	100	135

CLIMAX CATFISH LEADER Hard Mono
The special hardened surface of this leader makes it resistant to the rough mouth of the catfish, as well as to other sharp-edged obstacles. The leader also has very little elongation, which ensures direct contact with the fish. The rigidity of the material prevents tangles when casting and when on the bottom. Here is the perfect leader for catching even the most cautious of catfish.

Ø	0,90	1,05	1,20
kg	60	80	100

CLIMAX CATFISH LEADER Soft Mono
Our new Special Leader for 'tough customer' catfish is very supple and can be easily knotted. The surface structure provides reliable protection against wear and gives it that extra toughness needed when playing cats. Minimal expansion ensures direct contact with the fish. The leader also boasts excellent load bearing qualities.

Ø	1,00	1,20
kg	54	70

CLIMAX CATFISH KEVLAR LEADER

- 12-strand braid
- Ultra abrasion-resistant
- Super round with very smooth surface

Ø	0,80	1,00	1,50
kg	80	100	150
m	20	20	20

CLIMAX CATFISH STRONG
Developed for one of the strongest freshwater fish in the world, the Catfish Strong displays its strength under the hardest conditions: The extremely tight and round, 100% DYNEEMA®-Fibres braided line achieves 5 times higher abrasion resistance thanks to the multiple coating developed exclusively by us. Rocks, mussels, roots or limbs cannot harm this line and with its white color, it ensures good visibility. Whether its buoy fishing or bottom rigging, Catfish Strong can be trusted upon. Color: brown, white

single hook	7/0
treble hook	2/0
Ø line	1,00/1,30mm
breaking strain	54kg
length	180cm

NATURAL BAIT RIG – COMBI RIG
Rig designed especially for fishing with natural bait. The combination of stiff high-tech mono and braid protects against tangling in a current.
Fittings: VMC hook, ball-bearing mounted swivels, abrasion-resistant Mono and Catfish Strong line, 20g U-float. The length of the rig can be individually adjusted.

weight	20g
single hook	--
treble hook	2/0
Ø line	1,00/1,30mm
breaking strain	54kg
length	180cm

BAIT RIG (NATURAL BAIT)
Rig designed especially for angling with natural bait. Fittings: VMC single hook, ball-bearing mounted swivels, abrasion-resistant Mono and Catfish Strong line, 30g U-float. The length of the rig can be individually adjusted.

weight	30g
single hook	7/0
treble hook	--
Ø line	1,30mm
breaking strain	120kg
length	180cm

BAIT RIG (NATURAL BAIT)
Rig designed especially for angling with natural bait. Fittings: VMC treble hook, ball-bearing mounted swivels, abrasion-resistant Mono and Catfish Strong line, 30g U-float. The length of the rig can be individually adjusted.

weight	30g
single hook	--
treble hook	2/0
Ø line	1,30mm
breaking strain	120kg
length	180cm

BAIT FISH RIGS
Rig for fishing with bait fish.
Fittings: VMC single and treble hook, ball-bearing mounted swivels, abrasion-resistant Catfish Strong line. The length of the rig can be individually adjusted.

single hook	7/0
treble hook	3/0
Ø line	1,30mm
breaking strain	120kg
length	180cm

LOBWORM/CALAMARI RIG
Basic rig for fishing with lobworm bundles and/or calamari pieces. Fittings: VMC hook, ball-bearing mounted swivels, abrasion-resistant Catfish Strong line. The length of the rig can be individually adjusted.

single hook	5/0
treble hook	2/0
Ø line	0,92mm
breaking strain	80kg
length	180cm

GUDGEON/LOBWORM RIG
Rig for fishing with gudgeon or lobworm bundles.
Fittings: VMC hook, ball-bearing mounted swivels, abrasion-resistant Catfish Strong line. The length of the rig can be individually adjusted.

single hook	5/0 (2x)
treble hook	--
Ø line	0,92mm
breaking strain	80kg
length	180cm

BAIT FISH RIGS
Rig for fishing with bait fish.
Fittings: VMC single hooks, ball-bearing mounted swivels, abrasion-resistant Catfish Strong line. The length of the rig can be individually adjusted.

single hook	7/0 + 9/0
treble hook	--
Ø line	1,30mm
breaking strain	120kg
length	180cm

BAIT FISH RIG - COMBI RIG
Rig for fishing in flowing water with bait fish. The combination of stiff high-tech mono and braid protects against tangling in a current. Fittings: VMC hook, ball-bearing mounted swivels, abrasion-resistant Mono and Catfish Strong line. The length of the rig can be individually adjusted.

single hook	7/0 + 9/0
treble hook	--
Ø line	1,00/1,30mm
breaking strain	54kg
length	180cm

BAIT FISH RIG – COMBI RIG
Rig designed especially for fishing with small bait fish. The combination of stiff high-tech mono and braid protects against tangling in a current.
Fittings: VMC hook, ball-bearing mounted swivels, abrasion-resistant Mono and Catfish Strong line, 60g U-float. The length of the rig can be individually adjusted.

weight	60g
single hook	7/0
treble hook	3/0
Ø line	1,00/1,30mm
breaking strain	54kg
length	180cm

NATURAL BAIT MONO RIG
This rig is designed especially for fishing with natural bait. The combination of stiff high-tech mono and braid protects against tangling in a current. Fittings: VMC hook, ball-bearing mounted swivels, abrasion-resistant Mono line, 30g U-float. The length of the rig can be individually adjusted.

weight	30g
single hook	7/0
treble hook	--
Ø line	1,00/1,40mm
breaking strain	54kg
length	180cm

BAIT FISH RIGS
Rig for fishing with bait fish.
Fittings: VMC single and treble hook, ball-bearing mounted swivels, abrasion-resistant Catfish Strong line. The length of the rig can be individually adjusted.

single hook	7/0
treble hook	3/0
Ø line	1,30mm
breaking strain	120kg
length	180cm

LOBWORM/CALAMARI RIG
Basic rig for fishing with lobworm bundles and/or calamari pieces. Fittings: VMC hook, ball-bearing mounted swivels, abrasion-resistant Catfish Strong line. The length of the rig can be individually adjusted.

single hook	5/0
treble hook	2/0
Ø line	0,92mm
breaking strain	80kg
length	180cm

GUDGEON/LOBWORM RIG
Rig for fishing with gudgeon or lobworm bundles.
Fittings: VMC hook, ball-bearing mounted swivels, abrasion-resistant Catfish Strong line. The length of the rig can be individually adjusted.

single hook	5/0 (2x)
treble hook	--
Ø line	0,92mm
breaking strain	80kg
length	180cm

BAIT FISH RIGS
Rig for fishing with bait fish.
Fittings: VMC single hooks, ball-bearing mounted swivels, abrasion-resistant Catfish Strong line. The length of the rig can be individually adjusted.

single hook	7/0 + 9/0
treble hook	--
Ø line	1,30mm
breaking strain	120kg
length	180cm

BAIT FISH RIG - COMBI RIG
Rig for fishing in flowing water with bait fish. The combination of stiff high-tech mono and braid protects against tangling in a current. Fittings: VMC hook, ball-bearing mounted swivels, abrasion-resistant Mono and Catfish Strong line. The length of the rig can be individually adjusted.

single hook	7/0 + 9/0
treble hook	--
Ø line	1,00/1,30mm
breaking strain	54kg
length	180cm

All U-floats are available separately!

CLIMAX SOFT & STRONG

is successfully used by anglers between Alaska, Patagonia and Australia, from the Caribbean through Europe all the way into Mongolia.

Important Info: !

Tensile strength – breaking strain: The linear tensile strength or breaking strain of a line is a measure of its resistance to tearing without knots. Fishing lines from all manufacturers are always tested for their tensile strength under the same laboratory conditions. Unfortunately, not all manufacturers stick to this procedure and they mislead buyers by providing 'sugarcoated' or even faked test results. A tensile strength of 3.5kg to 4kg with a diameter of 0.20mm is regarded as a reliable and realistic reference for a very, very good monofilament line. Any noticeably higher values should ring alarm bells. EFTA, the European Fishing Tackle Trade Association, issues a quality certificate for the authenticity of the technical data of fishing lines. Climax was one of the initiators of this certificate and was involved right from the start. You really can trust it.

CLIMAX SOFT & STRONG

This all-round line combines strength, suppleness and elasticity in a very well balanced combination. It definitely is the right choice for anglers who want to cover all the areas of their passion with a really good line.

Attributes:

- Good breaking strain and knot strength
 - Suitable for fresh and salt water
 - Transparent, nearly invisible in water
 - Very good sensibility
- Color: white, blue, green, grey, brown, pink, rainbow

Ø	0,15	0,20	0,25	0,30	0,35	0,40
kg	1,6	2,8	4,2	5,7	7,2	10,2
Ø	0,45	0,50	0,55	0,60	0,70	0,80
kg	12,0	14,5	17,3	19,5	25,0	33,0
Ø	0,90	1,00	1,10	1,20	1,30	1,40
kg	38,0	46,0	55,0	65,0	70,0	80,0
Ø	1,50	1,60	1,80	2,00		
kg	90,0	96,0	110,0	125,0		

CLIMAX STRONG PLUS

Thanks to its low elasticity and high breaking strain, this line conveys direct bait contact, even over a wider distance. The hook can be set very quickly. It is very well protected against abrasion, thanks to its hard surface.

Attributes:

- Very high breaking strain and knot strength
- Low elasticity for direct bait control
- Abrasion resistant
- Ideal for fresh and salt water fishing
- Color: transparent

Ø	0,12	0,14	0,16	0,18	0,20	0,22
kg	1,5	1,95	2,6	3,3	3,9	4,5
Ø	0,25	0,28	0,30	0,35	0,40	0,45
kg	5,7	6,7	7,9	12,0	14,0	17,0
Ø	0,50					
kg	21,0					

CLIMAX SOFT PLUS

The perfect line for anglers who appreciate a soft line with little memory and higher elasticity absorbing heavy strokes of a fighting fish. In close and middle distances this line is ideal for delicate fishing for fresh water as well as sea fish in all sizes.

Attributes:

- High suppleness
 - Lower memory effect
 - Very good sensibility
- Color: light blue, transparent, his-vis, yellow

Ø	0,15	0,18	0,20	0,22	0,25	0,30
kg	2,2	2,8	3,5	4,3	5,0	7,2
Ø	0,35	0,40	0,45	0,50	0,60	0,70
kg	9,1	11,5	14,3	17,0	20,0	24,0

CLIMAX SALT WATER

CLIMAX SALT WATER is a hard, abrasion resistant fishing line that sea anglers will find ideal for boat and beach fishing. The special surface guards against abrasion and its toughness prevents salt crystal damage.

Attributes:

- Particularly resistant to UV rays
 - High abrasion resistance
 - Hard surface that resists salt crystals
- Color: orange, yellow, blue, transparent

Ø	0,25	0,28	0,30	0,35	0,40	0,50
kg	5,0	6,2	7,0	9,0	11,8	17,4
Ø	0,60	0,70				
kg	21,3	27,8				

CLIMAX PIKE

- excellent knot strength
 - low elongation for better contact to lure and fish
- Color: grey

Ø	0,30	0,35	0,40
kg	7,9	10,2	12,2
m	400	300	250

CLIMAX CARP

- special abrasion protection on surface
 - ideal elongation when playing the fish
- Color: brown

Ø	0,25	0,30	0,35
kg	5,6	7,9	10,2
m	500	400	400

CLIMAX CODFISH

- low elongation for heavy lures/baits
 - high visibility for controlled fishing
- Color: yellow

Ø	0,40	0,50
kg	12,2	17,3
m	250	200

CLIMAX EEL

- especially abrasion resistant
 - camouflage effect through dark colour
- Color: brown

Ø	0,30	0,35
kg	7,9	10,2
m	400	300

CLIMAX PEARCH

- Low stretch for direct contact
 - Extremely smooth and supple
 - High knot strength
- Color: grey-green

Ø	0,18	0,20	0,22	0,25
kg	3,0	3,7	4,3	5,6
m	500	500	500	400

Speci-Fish Lines

We have put a lot of time, effort and testing into the CLIMAX range of target species fishing lines. The results are clearly visible; a range of premium lines with high breaking strains that keep their promise! These lines are not just the right colour for the fish you're targeting. The elasticity, hardness and abrasion resistance have been finely balanced to suit the application, tackle and method required by the individual species. CLIMAX lines provide unbeatable quality and price.

CLIMAX TROUT

- excellent knot strength
 - extremely smooth and easy to cast
- Color: light-blue

Ø	0,17	0,20	0,23
kg	2,9	3,7	4,3
m	500	500	500

CLIMAX SEABREAM

- high tensile strength
 - highly resistant against saltwater
- Color: light-blue

Ø	0,28	0,30	0,35	0,40
kg	7,2	7,9	10,2	12,2
m	300	300	300	300

CLIMAX SEABASS

- high saltwater resistance
 - smooth surface for better casting
- Color: transparent

Ø	0,28	0,30	0,35	0,40
kg	7,0	8,0	9,5	12,0
m	300	300	300	300

CLIMAX CATFISH

- absorbs strong hits
 - high tensile strength
- Color: green

Ø	0,50	0,60
kg	17,3	19,5
m	200	200

CLIMAX BREAM

- very soft and smooth
 - almost invisible in the water
- Color: white

Ø	0,15	0,18
kg	2,4	3,0
m	500	500

CLIMAX PIKE PEARCH

- high tensile strength
 - low elongation for better contact to lure and fish
- Color: light-grey

Ø	0,24	0,28
kg	5,2	7,2
m	500	400
